

MUKESH BANDI

Software Engineer 2

+91-9989245715 @ bandimukesh21@gmail.com linkedin.com/in/bandi-mukesh-a96564bb Hyderabad, India

SUMMARY

Senior Full Stack Developer with 7.9+ years of expertise in designing and deploying high-performance web applications. Expert in the **Java/Spring Boot** and **Angular/TypeScript** ecosystems, I specialize in modernizing architectures through **Micro Frontends** and scalable **Microservices**. Committed to engineering excellence, I leverage automation, CI/CD, and comprehensive testing frameworks to deliver resilient, user-centric solutions in fast-paced Agile environments.

PROJECTS

T-Mobile Applications (Case)

Atlas & Expert Assist

- Atlas is an enterprise-scale web application that uses a **microfrontend architecture** to provide T-Mobile agents with a centralized, intelligent "Care Launchpad." By unifying tools like **Hands on Expert Assist** and **TMO Console**, it enables faster releases and improved system resilience for better customer support.
- Designed, developed, and maintained scalable web applications using Angular for frontend and Java, Spring Boot, and Microservices architecture on the backend, ensuring high performance and reliability.
- Built and integrated RESTful APIs and microservices, following best practices for modular design, security, and maintainability across distributed systems.
- Ensured code quality and reliability by achieving high unit test coverage, enforcing linting standards, and resolving SonarQube code quality and security issues.
- Leveraged modern development tools and AI assistance such as Claude, GitHub Copilot, and MCP Server AI integrations to accelerate development, improve code quality, and enhance developer productivity.

CGI Credit Studio

Automated Credit Application Processing System (ACAPSX)

- Developed and deployed comprehensive web applications for various loan originations including Credit Card, Personal Loan, and Buy Now Pay Later, utilizing Angular 16 and Micro Frontend architecture.
- Implemented Camunda Models for critical application stages such as duplicate checks, fraud detection, and credit bureau assessments, ensuring thorough validation processes.
- Built and managed a robust backend infrastructure using Spring Boot with Gradle and MongoDB, while integrating MySQL for key data management.
- Enhanced application security and navigability through the implementation of Routing and Role-Based Authentication with HTTP Interceptor.
- Optimized data flow and state management across micro frontends using Observables and Behavior Subject Patterns.
- Employed Agile (Scrum) methodologies and JIRA for efficient project management and streamlined delivery processes.

Optum Clinical Management

Optum Clinical Management (Optum)

- Created new features for the Clinical Management application using MVC pattern.
- Developed with Angular 9, specialized in Reactive forms and Nest.js integration.
- Implemented Routing and Behavior subject using Observable Service.
- Built Authenticated validations in NestJS with GraphQL Client integration.
- Used moment for time validations global improvements.
- Employed Nest JS with Azure functions and ensured code quality for SonarQube with GIT.

EDUCATION

B-Tech

CVR College of Engineering

09/2014 - 06/2018 Hyderabad, India

EXPERIENCE

Software Engineer 2

Concentrix Catalyst(T-Mobile Client)

08/2024 - Present Hyderabad, India

- Developed application related to T-Mobile customer interaction for case management and processing.

Lead Analyst

CGI Inc

02/2022 - 08/2024 Hyderabad, India

- Developed applications of credit loan originations-CGI Product (Multiple Clients).

Software Engineer

Zensar Technologies

06/2021 - 02/2022 Hyderabad, India

- Developed web applications related to financial domain of Fiserv.

Software Engineer

Optum Global Solutions

07/2018 - 06/2021 Hyderabad, India

- Developed multiple web applications related to Health care domain of UHG along with Financial Sector.

SKILLS

Angular	Java	Spring boot	
Typescript	GraphQL	HTML	
Nest JS	Mongo DB	MySQL	
Selenium	Java	Agile	API
Camunda	CICD	Git	
Gradle	Jasmine	Jenkins	
Jest	JIRA	Karma	MVC
Rest API	Angular Material		
Jasper	Sonar
